

CLIMBING

SINGING ROCK was founded in 1992. During 30 years of its existence, Singing Rock has established itself as a professional and innovative producer and supplier of climbing equipment. Nowadays SINGING ROCK is one of the world leaders on the market of climbing equipment for all activities in a vertical world. Most of the high-performance and innovative products are developed and produced in Czech Republic, Europe. All products are certified and fully comply with the international industrial safety standards. Our products are innovative, modern and easy to use, with great strength and with maximum comfort.

- Paralel core
- Braided core
- Braided intermediate sheath made from staple fibres
- Single tech sheath

INNOVATION

It is not necessary to talk too much about the innovation as it is inherently present in all our products.

TESTING

Meeting minimum requirements is obvious – but we go further by performing tests to simulate all kind of usage as the basis for further development.

TECHNOLOGY

Appropriate technology and tools are essential to produce first-class products.

KNOWLEDGE & EXPERIENCE

Our products and techniques are thoroughly validated not only in our testing centers. But also by our supported athletes and UIAGM mountain guides.

INVOLVEMENT

We are climbers and we love climbing. Enthusiasm drives our innovations and improvements.

PERFORMANCE

Do your climbing efficiently, safely and comfortably – we are here to give you the tools to do this. Enjoy your climb!

TRADITION & STABILITY

We draw on 30 years of our own experience and we are proudly inspired by vast knowledge and experience of climbers from our region.

EFFICIENCY

We run lean management system with horizontal organization structure. Thanks to this we are able to react immediately and customize our products and services for your specific needs.

ENVIRONMENT

We bear the responsibility to keep our planet green and to preserve its riches for our kids. SINGING ROCK is member of the European Outdoor Conservation Association.

SINGING ROCK CLIMBING TEAM 2021

Despite the fact that a year 2021 was still hard for travelling and climbing out of the home country, our athletes did some nice projects and achievements. It is important to mention that they always followed the rules and regulations of the pandemic situation in their country and did what they love the most – to climb as they used to be before the pandemic. Here are some of our athletes and their best climbs during 2021. Also other our athletes as Koen Baekelandt, Daria Brylova, Adam Karpierz, Lucie Hrozová and others climbed as much as they could and climbed nice projects.

KLEMEN BEČAN

New climbing crag in Hvar, Croatia

Klemen Bečan about the route from the cover photo: „Who is the best climber in the world? It would be impossible to say for sure. We believe it's the one who has the most fun. The **Megakante** sector is all about the exceptional experience; the place, the line, the unique moves, seeing off the last light of the day. For me, climbing is all about reaching the absolute limit, which I do by climbing as much as possible. I am consistently raising the bar with a never give up, try and try again attitude that has taken him to the top “.

Klemen Bečan, climbing coach and professional climber, has been active the whole year with climbing, coaching, route setting and living with his wife and son in their van. Klemen managed to climb super cool projects in Greece and Croatia. He onsighted one his 8b+ project in **Balbala, Greece** and managed to climb **Nid de fadas 9a** in Nifada sector. Not sure if it was first ascent or not. Despite his projects, coaching and climbing Klemen was also active with developing **new crag in Hvar, Croatia**.

FELIPE CAMARGO

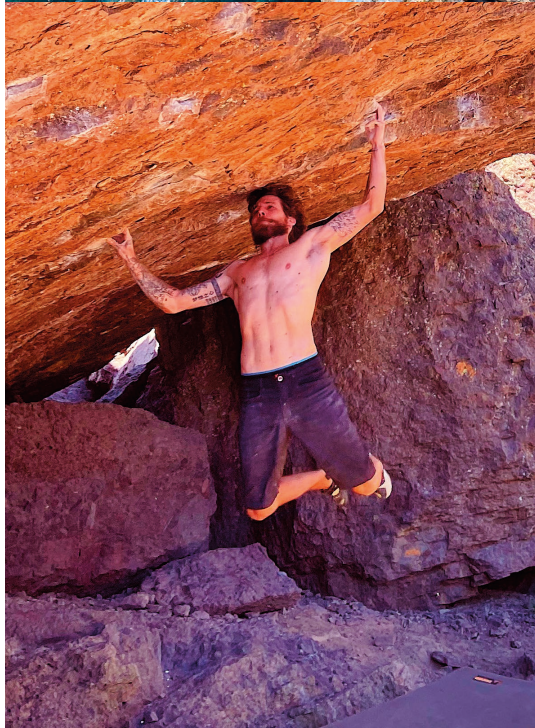

Felipe is back in climbing!

One year ago, Felipe had an injury when he was wakeboarding on his rest day, just a weekend before his 2 months' boulder trip to Switzerland. Felipe had the water with his left arm opened and ruptured the Pectoralis major tendon. "It sucks, I've been training a lot, I was feeling super strong and trying to be outside doing other sports, keeping the body in movement even on my climbing rest days...but it is what it is...everything happens for a reason and I'm sure there is a lot I need to learn in the process. After my surgery I'm ready to start the long road to recovery with a smile in my face and the same focus I had training".

Felipe's recovery was long and hard physically and mentally. But at the end of his **recovery journey he is back in climbing**. Felipe went to Chile for his bouldering trip and sent **Inferno V14** in Silla Del Diablo. "This boulder is the reason I came to Chile and it feels so damn good to get it done!! After over 2 years without traveling out of Brazil and the hell of a year I had last year with my injury and everything...this one felt good!! Feels like the "inferno" is finally behind me!"

Check more about his Chile bouldering trip

MARTIN STRÁNÍK

Two 8C and 2 bronze medals in World Cup.

Martin Stráník had a successful year full of great performance. In a winter time, when most of the climbers head south and climb in Spain or Greece, Martin due to Covid situation spent a lot of time at the bouldering crags in Czechia and managed to send **FA Warrior 8C and Black Panther 8C**. Both in winter conditions. Before sending Warrior 8C Martin said „I feel all drained and I doubt that I can finish today, but it feels a bit warmer and I reach the final section for the fourth time, so suddenly I hold the one-finger hole and make sure to finish and get to the top. Yes! **Warrior 8C**”.

After bouldering season Martin focused on the competitions and as a boulder specialist he made **2 times bronze medals in lead World Cup!** Martin said: „Wow, what a week this was! I’m still processing it and trying to sort out my thoughts a bit. I feel motivated and happy and I’m in a great shape. I scored two medals - unbelievable! I need to remain modest, though, as the three cool Olympic guys (Adam Ondra, Alex Megos and Jakob Schubert) were missing in the competitions, and I think they would have a lot to say about who should stand on a podium.”

Let’s hope that this season will be also full of Martin’s great achievements.

MARKĚTA JANOŠOVÁ

European Youth Champion

Markéta is young Czech talented climber who is in love with climbing. Markéta had very successful but also difficult year full of climbing. Marketa won her category A at the **lead European Youth Championship** in Perm in Russia. As Markéta said: „This year was full of ups and downs 1st half was awesome, 2nd part I don’t think so. I know the fastest way is not straight, it is curved. I hope it’s the truth because dreams are going to be closer and I’ll catch them”.

And what are her plans for this year? „For the year 2022, I’ll try to enjoy the life to the fullest. I’ll build a better healthy habits, try to reorganize my time better and make some time for my friends too. I’ll train harder, hopefully smarter too and become a better climbers and a person as well. I would love to climb outside boulders and some hard lead routes, because I haven’t done a really hard project already for 2 years”.

We wish Markéta good luck and a lot of power for her climbing.

HARNESSES

DOME

C5080

NEW

Durable big wall harness ideal for aid climbing, designed for maximum comfort on long days on the wall. Suitable for all who prefers the great support and comfort while climbing.

- reinforced ergonomically shaped padding provides maximum support in the lumbar and legs areas
- the waist belt is equipped with two buckles for perfect centering. The patented Rock&Lock buckle allows for quick and comfortable putting on and taking off the harness.
- adjustable leg loops with Rock&Lock buckles allow the harness to be dressed with skis or crampons on
- tie-in points are reinforced for greater durability of the harness
- possibility of attaching a hammer holder
- 7 gear loops with 5 kg capacity
- rear haul loop with 10 kg capacity
- 2 colour coded belay loops with 15 kN strength
- 2 slots for additional PORTER carabiners

Weight: 626 g • 22 oz (M/L)

Size: S, M/L, XL

Material: PAD, steel, EVA foam, PVC, PES, PP
 € 1019 • EN 12277 •

Comparison DOME C5080 (new) vs. DOME C5017 (old)

- More comfortable and durable construction
- Rock&Lock and double buckle in the waist belt for easier harness adjusting
- Available in 3 sizes
- 66 g heavier (M/L)

size	S	M/L	XL
A [cm]	65–80	75–90	85–100
B [cm]	25,5–31,5	29,5–35,5	33,5–39,5
C [cm]	50–55	60–65	65–70
D [cm]	19,5–21,5	23,5–25,5	25,5–27,5

CARABINERS

COLT SCREW 3PACK

K0112XX30

NEW

Three super light and small locking carabiners for belaying and anchoring on trad and alpine climbing for reduced price.

- hot-forged I-beam construction makes the biner very light and still extremely strong with 11 kN gate open rating
- angled snag free Keylock nose for smooth clipping and unclipping maneuvers
- ergonomic shape and gate position designed to provide large opening and large basket area
- large rope bearing radius reduces the wear of rope
- screw locking sleeve for great handling and effective locking
- for better gear management the screw gates are in different colors
- each carabiner is individually tested for the strength 10 kN
- unique production number for better traceability and inspection
- certified for both sport and industrial use

Color: silver

Weight: 48 g (1.69 oz)

Material: light alloy

Strength: major axis 26 kN

Strength: minor axis 8 kN

Strength: open gate 11 kN

Gate opening (d): 18 mm

CE 1019 • EN 12275 • EN 362

HARDWARE

FOOT LIFT

LEFT – RK807BX0L
RIGHT – RK807BX0P

NEW

Foot ascender to improve rope ascending in rope access. Used in conjunction with LIFT and CAM CLEAN.

- stainless steel toothed cam for higher corrosion resistance and for any conditions (frozen or dirty ropes)
- cam / lever mechanism fully integrated into the body
- durable construction with stainless cast steel
- fully adjustable webbing to achieve the best comfort of use
- lower part is reinforced with tubular webbing for longer use
- quick and easy to adjust with O ring
- marked with a unique production number
- for use with Ø 8–13 mm ropes, static and dynamic
- available in left and right version
- Foot Lift is not a PPE

Weight: 160 g • 5.6 oz
Working load: 120 kN
Material: light alloy, steel, plastic, PA

PULLEY EXTRA PLUS

RK808OS00
BLACK – RK808BB00

NEW

Large pulley for those who need great hauling efficiency, durability and light weight.

- durable and lightweight single pulley for industrial use and hauling systems
- for use with static and dynamic textile ropes
- sealed ball bearing and large diameter of the sheave provide great efficiency 94%
- designed and optimized for use with the Prusik friction knot or any clamps
- top attachment point accommodates up to three carabiners
- formed side plates provide protection of a rope against contact with surroundings
- fixed-by-forging sheave and anti-dust cover of ball bearing provide great lifespan
- side plate holes enable cleaning of ball bearing surroundings
- additional bottom attachment point for more complex pulley systems with a strength of 32 kN
- unique production number marking

Strength: 32 kN
Working load: 2x3 kN
Material Composition: 78% Light alloy, 21% steel, 1% plastic
Max. Ø rope: 13 mm static and dynamic ropes
Sheave: aluminium alloy
Side plates: aluminium alloy
Sealed ball bearing: steel
Axle: stainless steel
Weight: 276 g • 9.7 oz
€1019
EN 12278

SLINGS & VIA FERRATA SETS

PHARIO LITE

C2319YB00

NEW**Compact lightweight shock absorber with elastic arms for via ferrata.**

- new minimalist 27 mm wide shock absorber, stored in a compact package
- designed for all users, children and adults weighing between 40 and 120 kg (88–265 lb), who want to keep the weight of their equipment as low as possible
- ergonomically shaped Keylock PALM carabiners with wear indicator are easy to handle
- central loop for resting with a strength of 12 kN
- fall indicator label helps to detect if the shock absorber has already been activated and needs to be replaced
- maximal length of the activated fall absorber is 210 cm
- easy attachment to the harness with a 12 mm loop with twist
- the length of the set after attachment to the harness is 70 cm, with a maximum extension of 110 cm
- the durability of the 15 mm elastic arms is tested on a cyclic device, the stretching and shrinking process is carried out at least 50 000 times

Color: black / ice gray

Weight: 400 g • 14 oz (incl. carabiners)

Material: light alloy, HMPE, PES, PAD

CE 1019 • EN 958:2017 • EN 12275 • 

PHARIO 360°

C2318YB00

NEW**Compact lightweight shock absorber with elastic arms for via ferrata routes, rope courses and adventure parks.**

- new minimalist 27 wide shock absorber, stored in a compact package
- stainless steel swivel eliminates tangling of the flexible arms
- suitable for all users, children and adults weighing 40–120 kg (88–265 lb), who are bothered by the constant tangling of the elastic arms
- ergonomically shaped Keylock PALM carabiners with wear indicator are easy to handle
- central stitched loop for resting with the strength 12 kN
- fall indicator label helps to detect if the shock absorber has already been activated and needs to be replaced
- maximal length of the activated fall absorber is 210 cm
- easy attachment to the harness with a 20 mm loop with twist
- length of the set after attachment to the harness is 75 cm, with a maximum extension of 115 cm
- the durability of 20 mm the elastic arms is tested on a cyclic device, the stretching and shrinking process is carried out at least 50 000 times

Color: black / lemon

Weight: 485 g • 17 oz (incl. carabiners and swivel)

Material: light alloy, HMPE, PES, PAD, stainless steel

CE 1019 • EN 958:2017 • EN 12275 • 

PHARIO PALM

C2315XX00

NEW

Energy absorber for via ferrata routes, ropes courses and adventure parks with palm Keylock carabiners.

- for all users, from the kids to the adults weighing 40–120 kg (88–265 lb)
- ergonomically shaped Keylock PALM carabiners with wear indicator are easy to handle
- central loop for resting with the strength 12 kN
- fall indicator label helps to detect if the shock absorber has already been activated and needs to be replaced
- maximal length of the activated fall absorber is 210 cm
- easy attachment to the harness with a 20 mm loop with twist
- length of the set after attachment to the harness is 75 cm, with a maximum extension of 115 cm
- tear webbing energy absorber stored in more resistant cover
- the durability of 20 mm the elastic arms is tested on a cyclic device, the stretching and shrinking process is carried out at least 50 000 times

Color: black / lemon

Weight: 500 g • 17.6 oz (incl. carabiners)

Material: PES, PAD, light alloy

CE 1019 • EN 958:2017 • EN 12275 • 

BUNGEE 360

RK118WX000

NEW

Lightweight swivel tether for leashless climbing, attaches ice tools to the harness.

- prevents the loss or fall of ice axes
- two mini screw lock carabiners can be attached to the tool's spike or head
- a built-in swivel eliminates tangling
- V-shaped elastic webbing is short enough for tangle-free handling and may be stretched for maximum reach
- length of the lanyards can be extended from 80 up to 135 cm (incl. carabiners) and so allows free movements
- suitable for ice climbing, mix climbing and steep couloirs

WARNING! Do not use as a fall absorber!

Do not use as a belay stance lanyard!

Color white / yellow

Weight 110 g (3.3 oz)

Material 25% PAD, 5% elastic fiber, 70% light alloy

Strength 300 kg

Length 80–135 cm (incl. carabiners)

Gate opening (d) 12 mm

LOOP CHAIN

C2088WY00

NEW

Innovated daisy chain for aid climbing, rock and multi-pitch climbing. Thanks to its design it eliminates the risks of classic daisy chain.

- special 12 mm webbing combining PAD and DYNEEMA materials provides strength, durability and light weight
- the construction of the individual loops guarantees maximum safety with a strength of 22 Kn in each loop
- can be threaded through both tie-in points without pulling them together
- first loop adapted for connection to the harness with strap reversal
- stitching in the last eye fixes the carabiner in the correct position or prevents it from twisting
- can be shortened for desired distance between the anchor point and the harness
- Loop chain can be used as the anchor sling
- is also useful for setting the desired distance between the rappel device and the harness
- excellent sling for aid, multi-pitch and rock climbing

Weight: 75 g • 2.6 oz

Material: Dyneema, PAD, PES

Strength: 22 kN

Width: 12 mm

Length: 100 cm • 39 in

CE 1019 • EN 566:17 • 

CLOTHING & ACCESSORIES

APOLLO PANTS

CI034SS0

NEW

Men's technical pants for movement in the vertical world and for daily wear to work or school.

- the ergonomic REGULAR FIT cut with shaping at the knees and the inset gusset at the crotch guarantee maximum freedom of movement
- made of a blend of high quality cotton and spandex that guarantees breathability, durability and flexibility
- fastening of the pants with a high-quality YKK metal zipper and a metal button with the Singing Rock logo
- the possibility to tighten the width of the legs with an elastic band hidden inside the legs
- elastic band in the side seam for attaching a brush for cleaning the holds
- 2 front and 2 back comfort pockets
- the pants are finished with an enzymatic wash that makes them soft to the touch, shrunken and maximally comfortable

Size: S-XXL

Material: 96% cotton, 4% spandex

Colour: anthracite

Weight: 430 g • 15.2 oz

APOLLO SHORTS

CI035SS0

NEW

Men's technical shorts for movement in the vertical world and for daily wear to work or school.

- the ergonomic RELAX FIT cut with the inset gusset at the crotch guarantee maximum freedom of movement
- made of a blend of high quality cotton and spandex that guarantees breathability, durability and flexibility
- fastening of the shorts with a high-quality YKK metal zipper and a metal button with the Singing Rock logo
- elastic band in the side seam for attaching a brush for cleaning the holds
- 2 front and 2 back comfort pockets
- the shorts are finished with an enzymatic wash that makes them soft to the touch, shrunken and maximally comfortable

Size: S-XXL

Material: 96% cotton, 4% spandex

Colour: anthracite

Weight: 275 g • 10 oz

ROCKLIFE T-SHIRT LONG SLEEVE

CI036VX – MAN
CI037AX – WOMEN

NEW

Comfortable long-sleeved T-shirt for your climbing activities or everyday wear in a COMFORT FIT cut in a very pleasant meliert material.

- minimalist print and woven label on the sleeve
- women's model with a deeper V-neck
- printed size label
- made in the Czech Republic

Material: 40% cotton, 50% polyester,
10% elasthan

Size: XS–XL – women,

BALACLAVA PRO

C0088SB02 – S–M
C0088SB04 – L–XL**NEW**

Balaclava for the ultimate protection of the head, face and neck at cold and extreme conditions.

- provides great comfort due to stretchy, breathable fabric protecting your face while wicking moisture away
- designed for wearing under a helmet during all vertical activities
- you can wear it as a balaclava, half ski mask or neck gaiter. Just don't wear it in an airport or bank!
- suitable also for skiing, snowboarding, mountainbiking
- machine washable up to 30 °C
- available in two sizes, fits men & women

Size: S–M (52–55 cm), L–XL (56–59 cm)

Color: black

Material: 52% polyamide, 42% polypropylene, 6% elastan

BEANIE POLAR

C0090BB00

NEW

Warm Polartec® Power Stretch® beanie for sport and work activities.

- made of very warm stretch functional material that can wick away sweat and is more resistant to wind and abrasion compared to conventional materials
- fits well under the helmet for all vertical activities
- flat seams do not disturb when wearing the helmet
- suitable also for other outdoor activities – skiing, snowboarding, running, etc.
- machine washable up to 30 °C, not suitable for tumble dry
- available in one size, fits men & women

Size: UNI

Color: black

Material: 100% PES

TRAVEL MUG

P0048X400

NEW

Travel thermo mug for your favourite coffee, tea or cold drink when you are travelling, camping or working in the office.

- keeps your drink hot or cold exactly as you need it
- BPA free no-spill top features a handy hinged lid to securely close when it's not in use
- made of durable, high-grade stainless steel that preserves the flavour and freshness of your drink
- double vacuum-insulated wall keeps the drink hot / cold for long hours, making it ideal for travel by car or other means of transport
- exterior is made of a bamboo composite material which protects your hands from heat
- non-slip bottom, suitable for all common car drink holders

Weight: 170 g • 6 oz

Capacity: 400 ml • 14 fl oz

Height: 17 cm • 6.7 in

Material: stainless steel, bamboo, BPA free plastic

BEER MATS

P0047XX01 – SQUARE

P0047XX02 – CIRCULAR

NEW

Wooden beer mat under your favorite glass of beer or cup of tea and coffee.

- perfect way to protect the surface of your table from the wet beer mugs or coffee cups
- made of very durable, high quality birch plywood coated with transparent varnish

**SINGING
ROCK
IS CLIMBING**

has its spirit as a company where climbing equipment is produced by Climbers for Climbers.

Our company is located in Czech Republic near Krkonoše National Park and Bohemian Paradise where are situated the amazing and unique sand stone rock climbing areas.

Most of our staff are climbers, alpinists or backcountry skiers. "Crazy cools" with ice axes, haul bags, skis and crampons. Most of us took our first steps within the sand stone labyrinths of Bohemian Paradise or hard granite of the Jizera Mountains. Some of us later on continued to the higher mountains or have specialized on sport climbing or bouldering.

The Singing Rock Climbing Team with our world class athletes help us to test, improve and develop new functional as well as a high quality climbing equipment. Felipe Camargo, Carlos Logroño, Martin Stranik Lucie Hrozová, Czech UIAGM Mountain guides and others help us to test and improve every product which is coming out of our factory. SINGING ROCK is climbing and we are committed to bring you high quality and highly-functional equipment with minimal impact on the environment.

SINGING ROCK TEAM
